

Assessment 2014.15

From September, the only year groups that will be assessed using levels will be Years 2 and 6, these being the final assessment years under the old system.

Years 1, 3, 4 and 5 will be assessed using a range of tools across the year, using both *assessment of* and *assessment for* learning. These will be on going and used to measure attainment and progress.

The new national curriculum has higher expectations in each year in order for the children to achieve the expected standard. The school has been teaching the new curriculum in English and Maths for a year already in preparation.

We will be providing information across the year to help parents to understand these changes and how achievement will now be reported.

A presentation was given to parents Monday 15th September. Please click to see the slides (for information on the new curriculum, please see relevant curriculum pages on the website).
